

Module 19 - while Loop

1. What is a while loop?

A while loop is a loop that repeatedly executes a block of code as long as a given condition is true.

Example Code:

```
// while Loop
/*
    initialization;
    while(condition){
        Statement;
        counter;
    }
*/

// let val = 10;
// while(val >= 1){
//     console.log(val);
//     val--;
// }

let num = 1234;
let sum = 0;
// 1 + 2 + 3 + 4 = 10
while(num > 0){
    let last = num % 10;
    num = parseInt(num / 10);
    sum = sum + last;
}
console.log(sum);
```
